Script for creating a weather forecast

Hey "Mr. Teacher's" class what's going on? My name is _____
and I am here to use what we are learning in science class to predict what kind of weather
we will be seeing in our area later today.

The current temperature is _____ and the current weather conditions are _____
_____and _____ .

The wind is out of (give the direction) _____ at _____ mile per
hour.

The barometric pressure currently is _____ inches and _____
(rising, falling, or steady).

My prediction for the weather later today is

_____
and _____
...because (give two reasons why you made this prediction)…

_____
and _____
.

Scoring Guide:

You will receive one point for each accurately completed blank in the above script for a
total maximum of 12 points. Your teacher will be looking at your responses for
completion (all items in script addressed) and **accuracy** (responses based on reputable
sources, carefully collected data, and valid science knowledge).

9 points or less = try again
10 points = meets expectations
11 points = super
12 points = grand weather guru
