

## Example Prairie Land Simulation Organizer

### Cattle Ranchers

You are cattle ranchers and you want to use the land for your extra cattle. The land on the lot is very good for grazing cattle. If you are careful about grazing your cattle, the ecosystem will not be as damaged as when a building is placed on the land. You don't have a lot of money, but you are willing to pay the owners \$1,000.00 per year to rent the land. This happens to be the same amount that the owners pay in property tax.

Choose a name for your ranch and plan out the arguments for how you think the prairie land should be used.

Name of your ranch

How much money are you willing to pay the owners for the prairie land? \_\_\_\_\_
