Balloon Rockets

I think that ________________ will make a difference in how far the balloon rocket travels.

I predict that....

<table>
<thead>
<tr>
<th>Trial number</th>
<th>What we changed about the balloon.</th>
<th>What happened when we changed this</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

What I think after my balloon tests and why....
Draw a rocket and label the parts based on the information from the text

<table>
<thead>
<tr>
<th>Trial</th>
<th>Change in variable</th>
<th>Distance travelled (in cm)</th>
<th>Observations</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>3</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>4</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
