

# How Far Did It Go?

Before the car moves

After the car moves and stops

Gracie wants to measure the distance that her toy car travels. She places her car next to a measuring tape as shown in the first picture. She pushes the car. The second picture shows how far Gracie’s car traveled until it stopped. Gracie measures the distance her car moved.

Circle the number of measurement units that best describes how far Gracie’s car moved.

- A** 2
- B** 4
- C** 6
- D** 8
- E** 10

Describe how you figured out your answer.
