# Site record sheet

**Location:** ______________________

**Recorder Name:** _____________________________

1. Walk around and survey (notice) any items on the ground.

2. With your group, use the measuring tape to find out how many feet wide and long the area is surrounding all of the items you have found.

   ____m

   ____m

3. Look at the items you found. Now, measure the distance from the item to the edge of the site. Write your items below on the first line and the distance from the edge on the second line on the right.

   Item 1: ________________________________ Distance from edge: _______cm

   Item 2: ________________________________ Distance from edge: _______cm

   Item 3: ________________________________ Distance from edge: _______cm

   Item 4: ________________________________ Distance from edge: _______cm

   Item 5: ________________________________ Distance from edge: _______cm

   Item 6: ________________________________ Distance from edge: _______cm

4. Describe each of the items. Do your best to name them and describe what they were used for or what they are. Give at least 1 reason for why you think the items were used the way they were.

<table>
<thead>
<tr>
<th>Item Name/ description</th>
<th>What was it used for/ what is it?</th>
<th>How do you know? Prove it? Show evidence!</th>
</tr>

Mapping Worksheet

1. Use your compass to find where North, South, East, and West should be located on your map. Mark it now on the compass rose at the bottom. Make sure you put items on the map according to where North is.

2. Create a map including the following:
   a. Compass rose (north arrow)
   b. Title
   c. Key with labels on the map
   d. Artifacts found
   e. Measurements
