Earth’s Water is Found Where?

What are places that water is found on the Earth?

<table>
<thead>
<tr>
<th>Freshwater Sources</th>
<th>Saltwater Sources</th>
</tr>
</thead>
</table>

Look back at your list above and divide your water sources into two categories – freshwater and saltwater.

Total: 1000 ml

Saltwater = _____ ml

Freshwater = _____ ml
Label each amount

What does each amount represent?

Explain how water is distributed on the Earth. Make sure to describe saltwater versus freshwater and what the different types of freshwater are.
