Try 1	Try 2	Try 3	Try 4
			

I noticed that the sand \_\_\_\_\_

the more that the wind blew against it.

**Draw arrows showing where water was hitting the rock cliff. What observations did you make about the waves and the rocks?**

**Draw your observations of the sand and what you see when the water was sitting in the tray.**

**Draw your observations of the sand and what you see when the water was moving against the sand.**

**The river model looked like this at the beginning.**

**The river model looked like this at the end.**

**What do you notice as the water moves across the land?**
