

Dear Parents,

The Fourth Grade classes will be starting our Global Awareness Inquiry unit for Science. We will be taking a closer look at trash pollution and its impact on the Earth's surface. Since garbage is something that is found both at home and at school, we are asking for your support to have a conversation about trash pollution, recycling, and reusing materials at home.

Your child will be participating in many hands-on activities throughout the unit including logging and charting trash from their lunches. We hope this will solidify their understanding of how much trash we produce as a class and create a personal connection to the inquiry science unit.

Thank you so much for your support!

Sincerely,

The Fourth Grade Team
