

Paper Cubes

Materials:

Cube template (See cube assembly instructions below)
Glue stick
Scissors
File folder or heavy card stock

Cubes Assembly Instructions:

1. Print out or copy the cube template onto a standard 8.5"x11" sheet of paper. You should print the template in a portrait orientation.
2. Once you have the template printed out, get a pair of scissors, a glue stick or tape, and a piece of cardstock or tear a file folder in half. (See Figure 1).

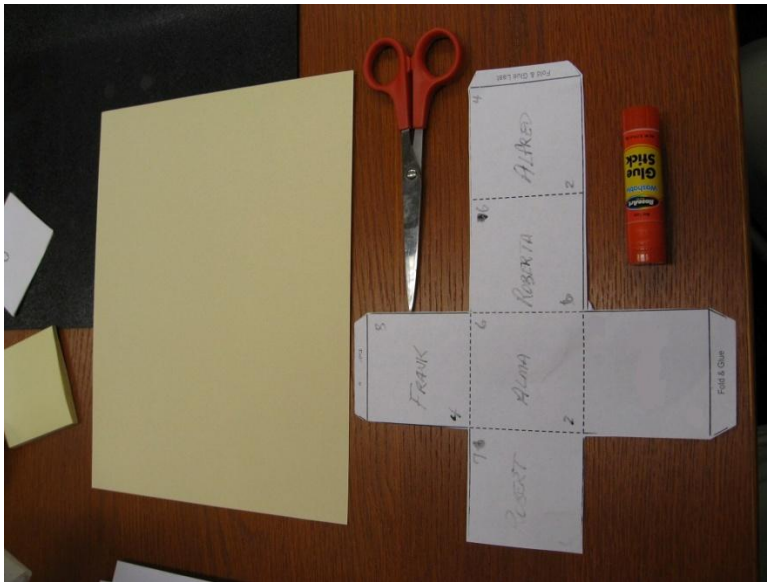

Figure 1: Collect Materials.

3. Place the template on top of the cardstock/folder and cut out the template. Then copy the names, numbers, and lines for each side of the cube onto the cardstock. (See Figure 2). Names on opposite sides of the cube should be written in the same color (Blue for Alfred and Alma. Red for Robert and Roberta. Black for Frank and Francine).

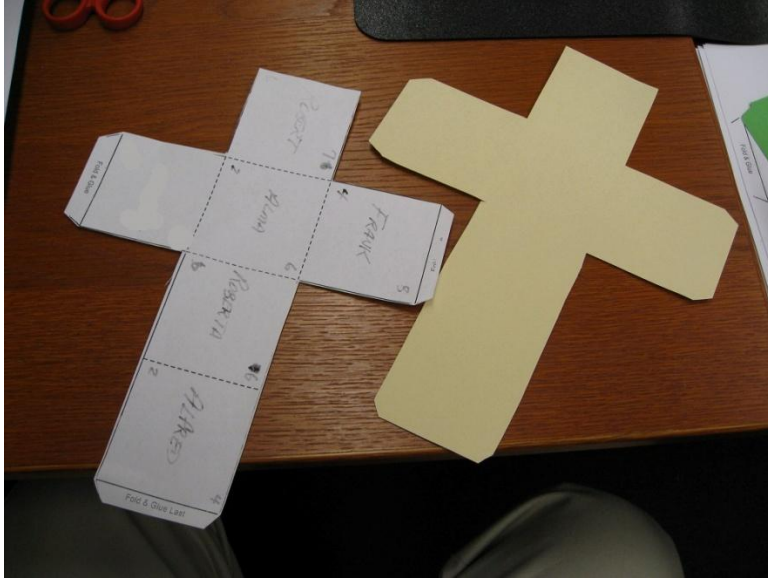

Figure 2: Cardstock cut out before copying of names/numbers.

4. You will need to fold the cubes along the lines on the template to ensure a good cube and then glue the flaps. (See Figure 3).

Figure 3: Gluing the final flap of the cube.
