1st Place – Pads for the Planet – Isthmus Montessori Academy, Madison

About eCYBERMISSION

eCYBERMISSION is an online science, technology, engineering, and mathematics (STEM) competition for students in grades six through nine that promotes teamwork, self-discovery, and the real-life applications of STEM. Students work in teams, with the help of a Team Advisor, to choose a problem in their community to explore with science or solve with engineering. Students experience STEM firsthand and learn how they can use it to change the world while interacting with STEM professionals and competing for state, regional, and national awards. eCYBERMISSION students have applied for and received patents, expanded their projects into businesses, and achieved further national recognition, including the first ever TIME's "Kid of the Year". eCYBERMISSION is part of the Army Educational Outreach Program (AEOP) and administered by the National Science Teaching Association (NSTA).
