Registration Now Open for the 12th Annual eCYBERMISSION Competition

U.S. Army Program Provides Dynamic Teaching Tool for Educators to Help Encourage Students to Pursue Careers in Science, Technology, Engineering and Math

ARLINGTON, Va. – Thursday, October 10, 2013 – Registration is now open for the 12th annual eCYBERMISSION, one of several science, technology, engineering and math (STEM) initiatives offered by the Army Educational Outreach Program (AEOP). The program, sponsored by the U.S. Army and administered by the National Science Teachers Association (NSTA), is a free online learning competition designed to cultivate student interest in STEM by encouraging students in grades six through nine to develop solutions to real-world challenges in their local communities. Students can win on a state, regional, and national level, with national winning teams receiving up to \$8,000 in U.S. EE Savings Bonds, valued at maturity. Registration is open until January 15, 2014 at www.ecybermission.com.

Through the program, three to four students plus an adult team advisor are asked to identify an issue in their community related to one of seven mission challenges, including:

- alternative sources of energy;
- the environment;
- food, health and fitness;
- force and motion;
- national security and safety;
- robotics; and
- technology.

After selecting a mission challenge, teams apply the scientific practices or engineering design process to propose a solution. Each team then submits a mission folder, the official write-up of their project, via the eCYBERMISSION website.

A panel of virtual judges evaluates and scores the mission folders on the basis of several criteria to identify state winning teams. The state winning teams then move on to the regional competition, where they compete with other teams in their grade across the region for an all-expenses paid trip to the National Judging and Educational Event, taking place June 2014.

The program also provides teams with the opportunity to interact with STEM professionals virtually who volunteer in the competition to assist students and teachers with their projects.

Registration for the 2013-2014 competition will remain open through January 15, 2014. Final Mission Folder submissions are due March 1, 2014. To participate, students must be U.S. citizens enrolled in a U.S.-based public, private or home school, or Department of Defense Education Activity school.

Students registered by November 1 will receive a free STEM Research Kit. All registered teachers will receive an eCYBERMISSION Starter Kit, which includes lessons, resources and tools available to introduce the competition in the classroom.

For more information, visit www.ecybermission.com or contact eCYBERMISSION Mission Control at 1-866-GO-CYBER (462-9237) or via email at missioncontrol@ecybermission.com.

About Army Educational Outreach Program

The AEOP Cooperative Agreement was formed by the U.S. Army Educational Outreach Program (AEOP) and includes Virginia Tech as the lead organization, the Academy of Applied Science, American Society for Engineering Education, the Technology Student Association, the University of New Hampshire and NSTA. AEOP is charged with addressing national needs for a STEM literate citizenry through a portfolio of educational opportunities which includes unique experiences, competitions, and high school internships that aim to spark an interest in STEM and encourage participants to pursue college and careers in STEM fields. The Army is committed to increasing the STEM talent pool in order to ensure our national security and global competitiveness. For more information on AEOP, visit www.usaeop.com.

About RDECOM

RDECOM has the mission to develop technology and engineering solutions for America's Soldiers. It is a major subordinate command of the U.S. Army Materiel Command. AMC is the Army's premier provider of materiel readiness -- technology, acquisition support, materiel development, logistics power projection, and sustainment -- to the total force, across the spectrum of joint military operations. If a Soldier shoots it, drives it, flies it, wears it, eats it or communicates with it, AMC provides it. For more information on RDECOM, visit www.army.mil/rdecom.

About NSTA

The Arlington, VA-based [National Science Teachers Association](http://www.nsta.org) is the largest professional organization in the world promoting excellence and innovation in science teaching and learning for all. NSTA's current membership includes approximately 55,000 science teachers, science supervisors, administrators, scientists, business and industry representatives, and others involved in science education.
