

# 3.8

## Sheet of Solar Images for Experience 3.8

All of these images were taken on April 18, 2015

Visible light from the Solar Dynamics Observatory

X-rays from Hinode spacecraft

Infrared from National Solar Observatory

Extreme UV from the Solar Dynamics Observatory

(Note that all these images are artificially colored. Don't pay attention to the colors, but look at the structure—the details of what is bright and dark and where things are.)
