

Chemical Reaction #1: Breaking down a piece of a protein into amino acids

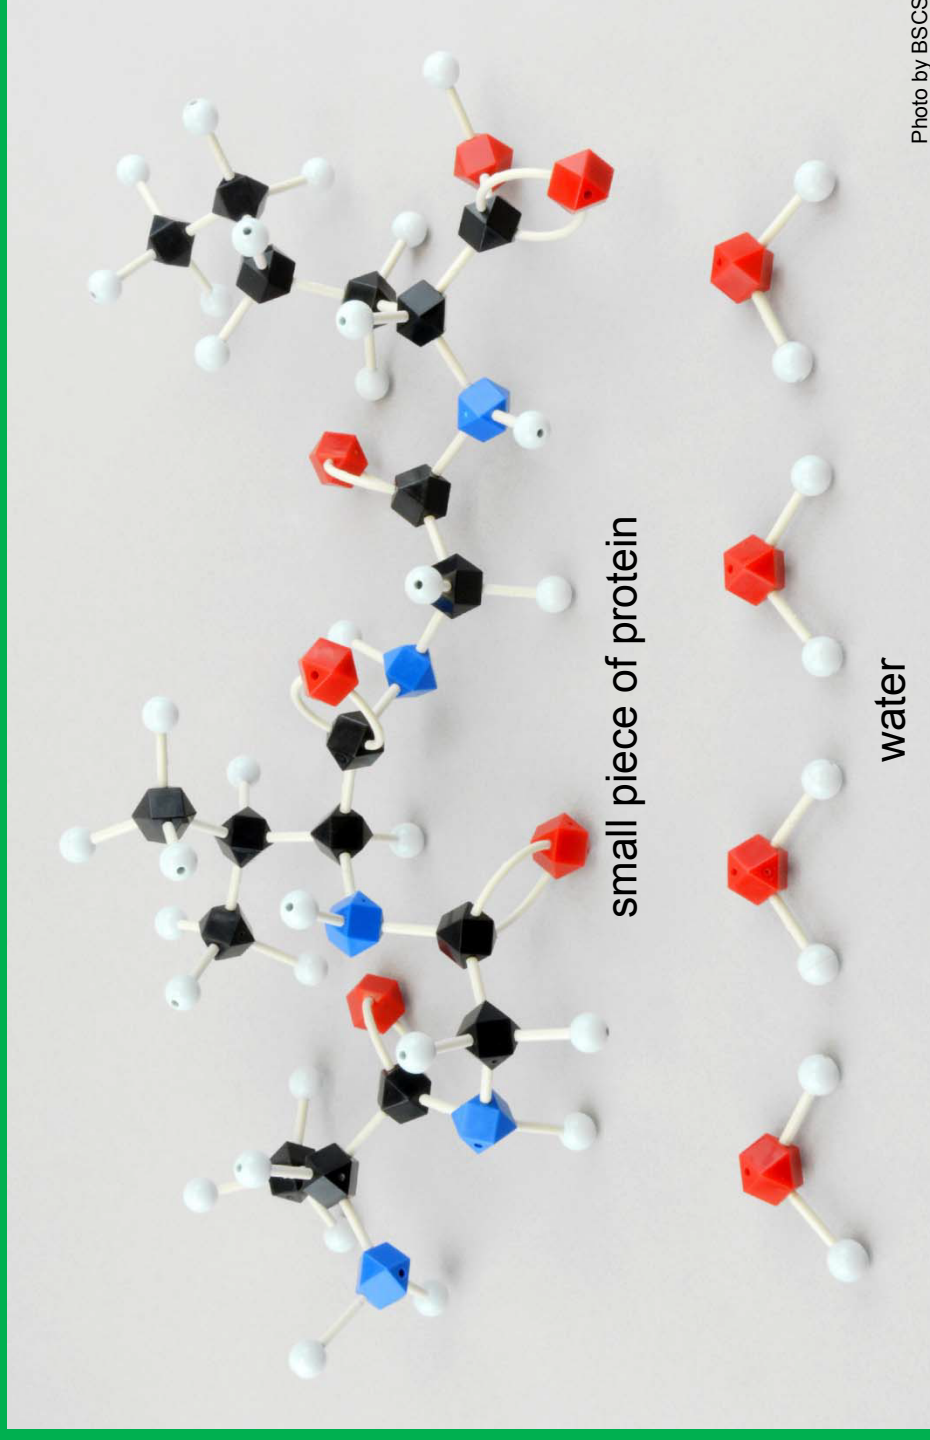

Reactants (starting substances)

Chemical Reaction #1: Breaking down a piece of a protein into amino acids

Products (ending substances)

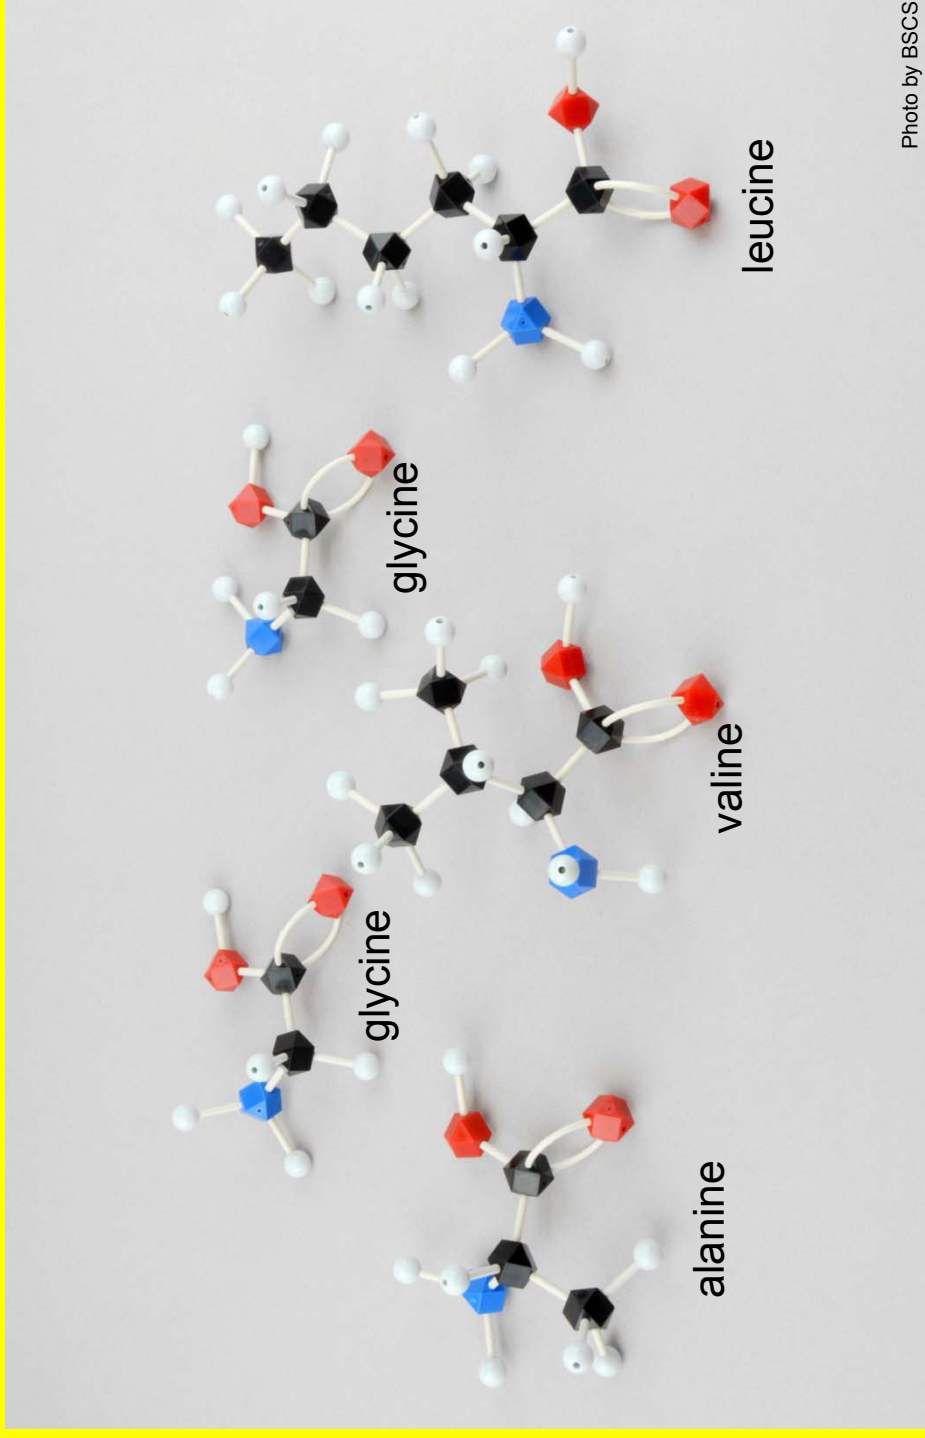

Chemical Reaction #1: Breaking down a piece of a protein into amino acids

Reactants (starting substances)

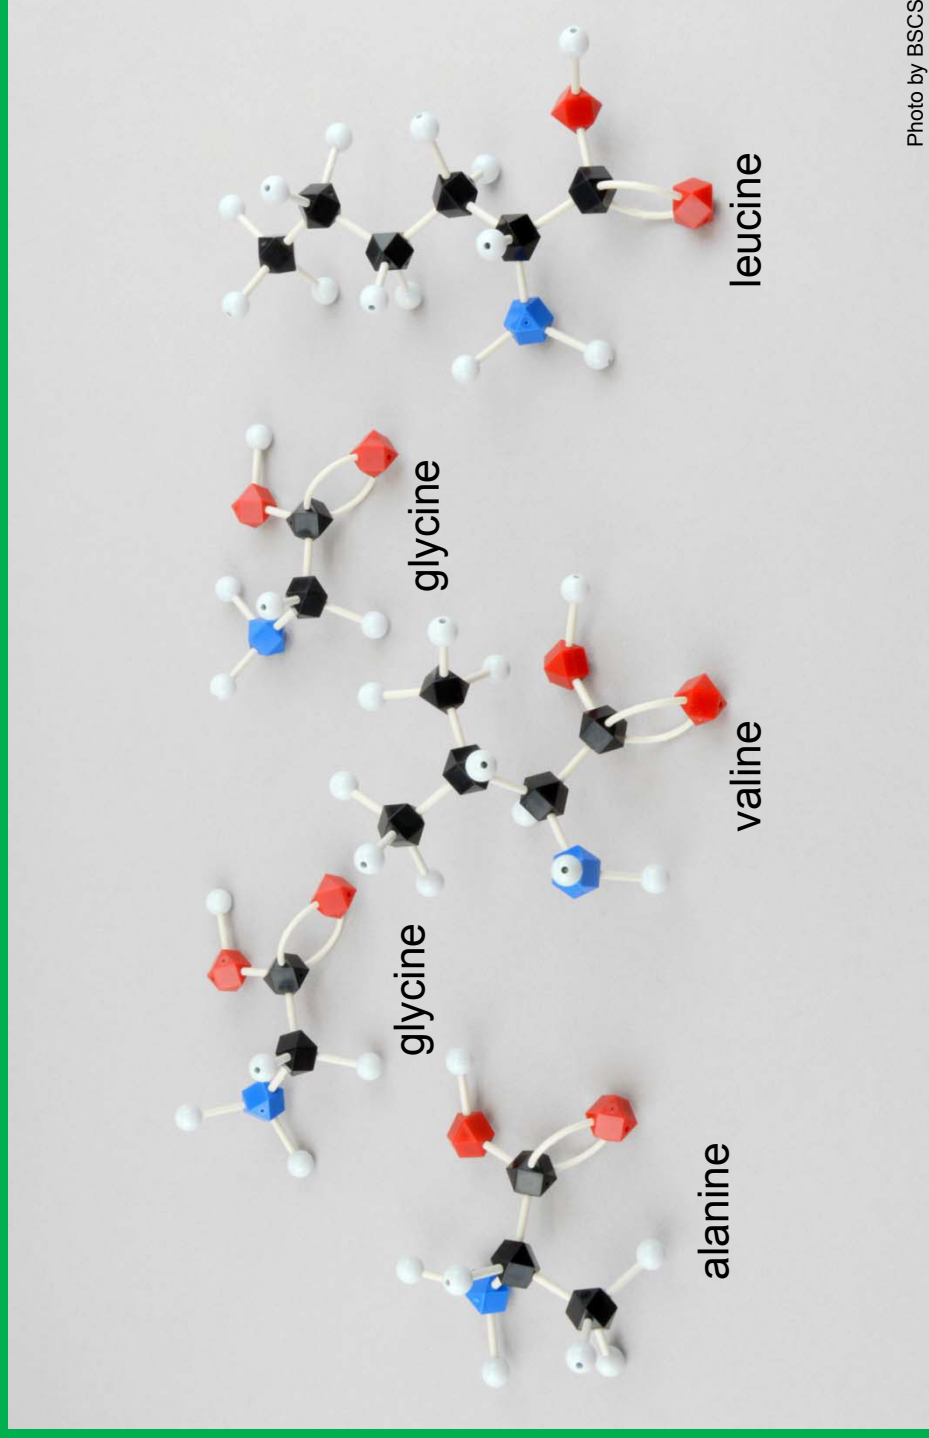

Chemical Reaction #1:

Breaking down a piece of a protein into amino acids

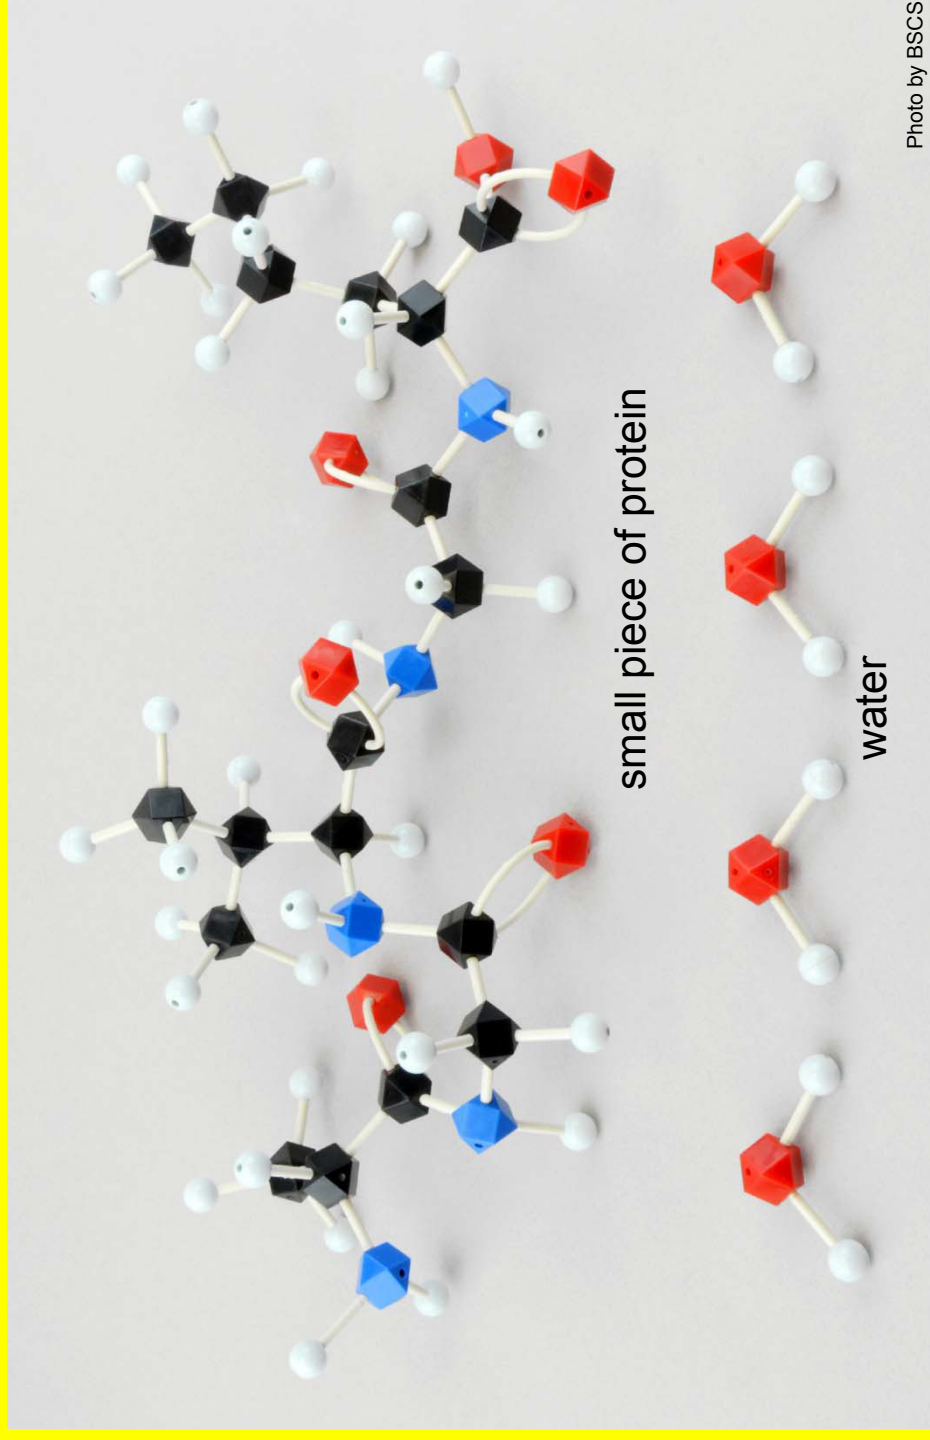

Products (ending substances)

Chemical Reaction #2: Building a piece of a protein from amino acids

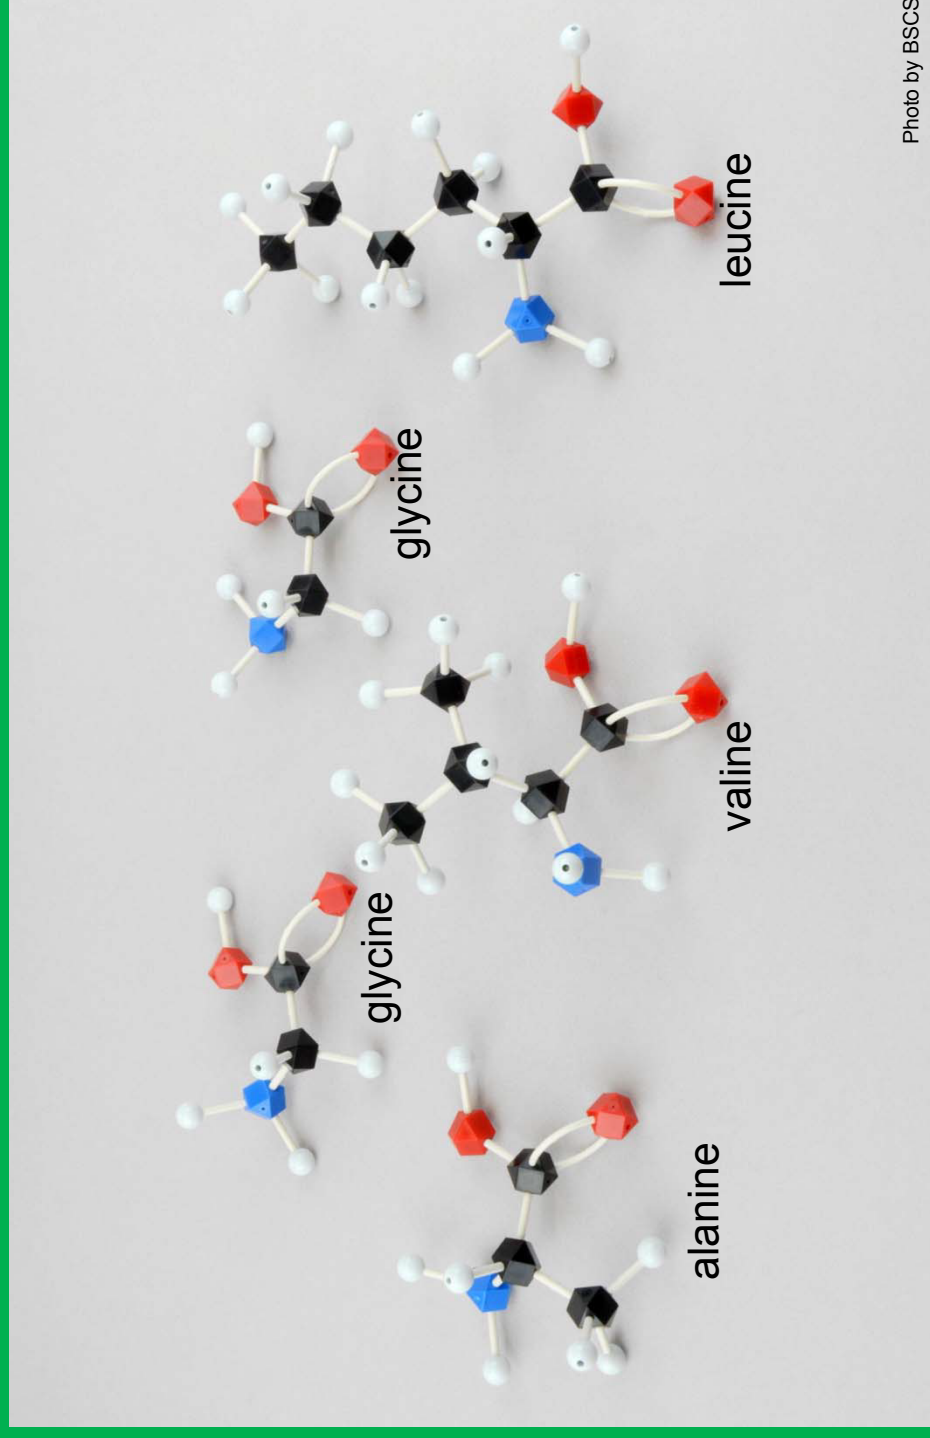

Reactants (starting substances)

Chemical Reaction #2: Building a piece of a protein from amino acids

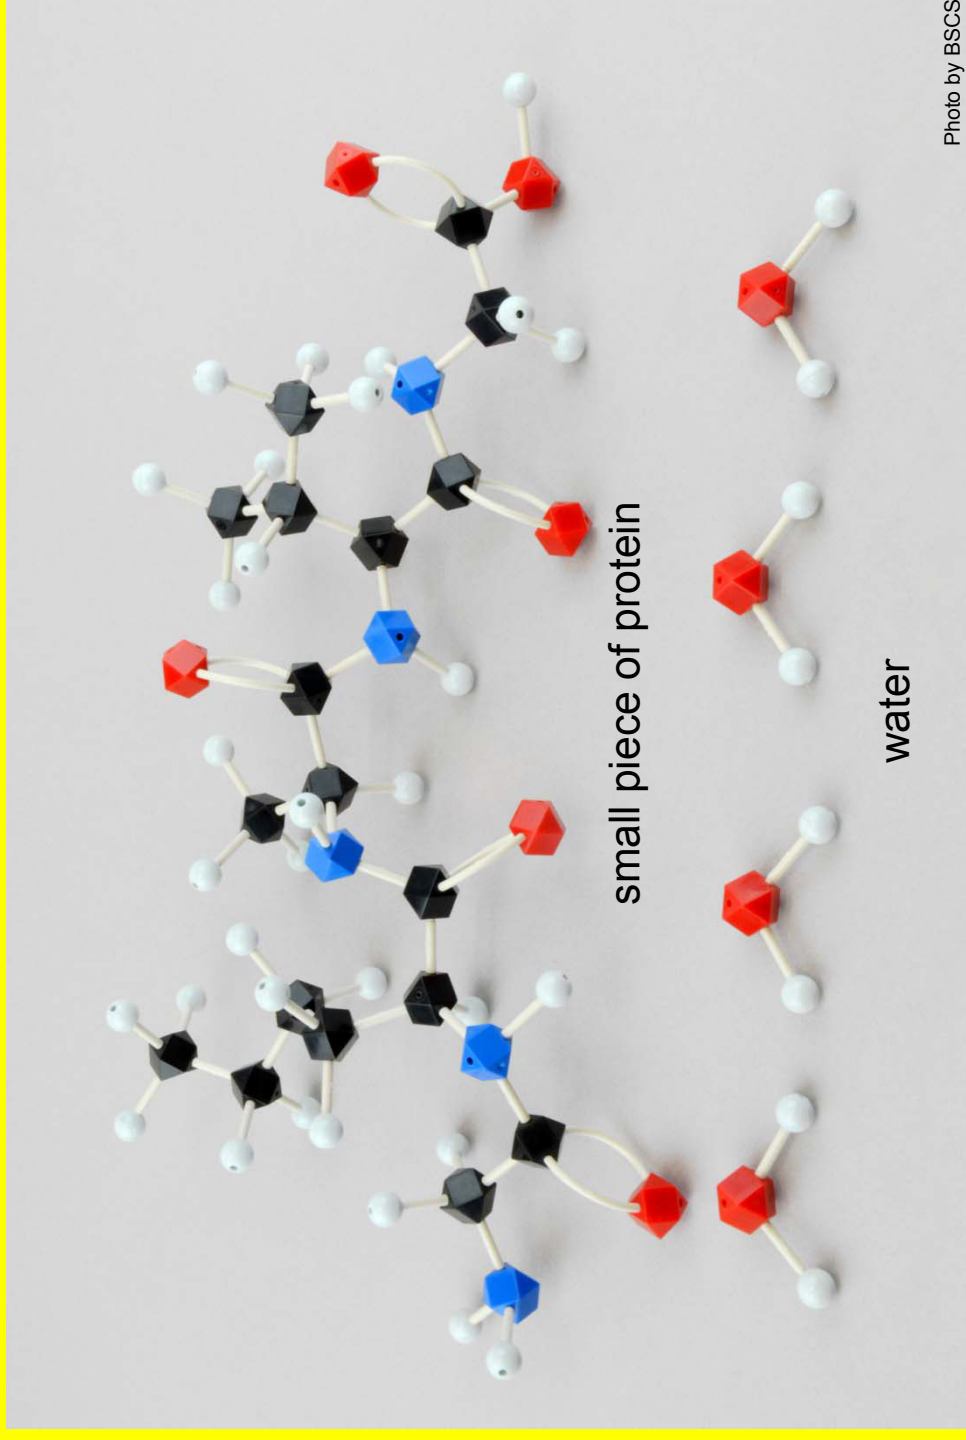

Products (ending substances)

Chemical Reaction #2: Building a piece of a protein from amino acids

Reactants (starting substances)

Chemical Reaction #2: Building a piece of a protein from amino acids

Products (ending substances)
