

# Teacher's Name

Current position

## Profile:

When people ask me what I teach, I always respond: "I teach students". I don't consider myself a subject teacher, but instead one that teaches skills through scientific inquiry and environmental activism, taking into account the complexities of my students' needs. I teach with two goals in mind: instill curiosity about the world (scaffolded inquiry) and expose them to the community so they can empathize and become active members of their world (civic participation).

## Experience:

Alliance for College Ready Schools (2007-Present)

*Alliance Environmental Science and Technology High (2011-Present) & Alliance Gertz Ressler High (2007-2011)*
