

The Story of Dinosaur Evolution

by

Jeffrey Scott Coker, Department of Biology, Elon University, Elon, NC

Jimmie D. Agnew, Physics Department, Elon University, Elon, NC

Note to Instructors: This case is different from others in that there is no case. Students are given instructions along with a set of handouts from which they create their own stories. Specifically, working in groups students write a story about the evolution of a particular group of dinosaurs (either ornithischians, sauropodomorphs, or theropods). See the teaching notes for full details.
