

Bibliography on Case Study Teaching in Science, Technology, Engineering, and Mathematics

by

Nancy A. Schiller, Librarian Emeritus, and Clyde F. Herreid, Professor Emeritus
University at Buffalo, State University of New York

Last Updated: August 5, 2022

This updated, retitled, and reorganized version of the bibliography provides references to journal articles, books, book chapters, conference papers, and dissertations, beginning with background information on the case method followed by sections on writing cases, teaching with cases, facilitating case discussions, assessing student case work, cooperative learning/small groups, problem-based learning, and guided design.

CASE STUDIES

The National Center for Case Study Teaching in Science (NCCSTS) case collection contains over 900 peer-reviewed case studies in all areas of science. Originally developed at the University at Buffalo under the direction of Clyde Freeman Herreid and Nancy A. Schiller, the NCCSTS case collection was transferred to the National Science Teaching Association (NSTA) in February 2022. To learn more about how you can access these cases and their detailed teaching notes, visit the NSTA website at <https://www.nsta.org/case-studies>
