

Figure 2.

Worm behavioral observations/reactions.

Aspects of Sensation and Behavior	What is the worm's reaction to the following?	Predictions	Worm Behavioral Observations/Reactions
Light	Light or dark?		
	Flashlight beam on anterior end?		
	Flashlight beam on posterior end?		
Color	Preference for any particular surface color?		
Touch	Preference for rough or smooth surface (sand paper versus smooth paper)?		
	Gentle tap of pencil near anterior end?		
	Gentle tap of pencil near posterior end?		
Vibration	Gentle, rhythmic tapping on table top?		
Wind	Warm or cool air being blown over specimen?		
Sound	Sound of your voice?		

	Musical instrument played nearby?		
	Recorded music played nearby?		
Temperature	Ice?		
	Paper towel warmed gently by light?		
Taste/Smell	Various potential food items?		
	Various strong scents/tastes (e.g., garlic, minty toothpaste, etc.)?		
Social Interaction	Another worm nearby?
