

Glacial hitch hikers worksheet.

Day 1

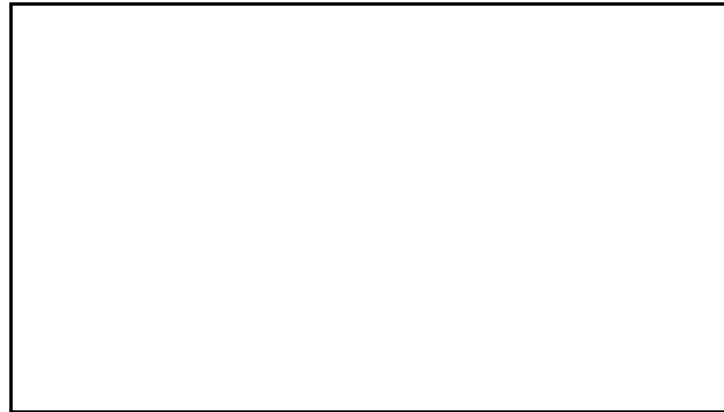

Draw what the contents in the container look like BEFORE the contents are frozen, in the space given below:

Write a prediction of what you think is going to happen when the contents in the container are frozen. Do you think that the dirt, pebbles and rocks will become frozen together, or will they remain separate from the ice?

Day 2

Draw what the contents in the container look like AFTER the contents are frozen in the space given below:

Write what you observed to have happened to the contents in the container. Did they become frozen together, or did they remain separate? Explain why they did that.
