

Does It Have a Life Cycle?

How do you decide if an organism goes through a life cycle? Put an X next to the organisms that have a life cycle.

- | | | |
|--------------------------------------|------------------------------------|-------------------------------------|
| <input type="checkbox"/> frog | <input type="checkbox"/> cow | <input type="checkbox"/> daisy |
| <input type="checkbox"/> butterfly | <input type="checkbox"/> mushroom | <input type="checkbox"/> chicken |
| <input type="checkbox"/> grasshopper | <input type="checkbox"/> grass | <input type="checkbox"/> maple tree |
| <input type="checkbox"/> fern | <input type="checkbox"/> earthworm | <input type="checkbox"/> human |
| <input type="checkbox"/> shark | <input type="checkbox"/> snail | <input type="checkbox"/> beetle |
| <input type="checkbox"/> bean plant | <input type="checkbox"/> mold | <input type="checkbox"/> crab |
| <input type="checkbox"/> snake | <input type="checkbox"/> spider | <input type="checkbox"/> moth |

Explain your thinking. Describe the rule or reason you used to decide if an organism has a life cycle.
