

Environment Investigation

Conclusion:

1. In this investigation, we found out that....

(describe in your own words how environment affects insects population).

2. I know this is true because on my graph...

(compare the data from from the two environments- you might have to use more than your graph to support your finding)

3. I think it turned out this way because....

(describe in your own words why you got the result you got)

BONUS: Something I'm still wondering about.... The best part was.... A new question I have science skills I used were....
