

**More notes.**

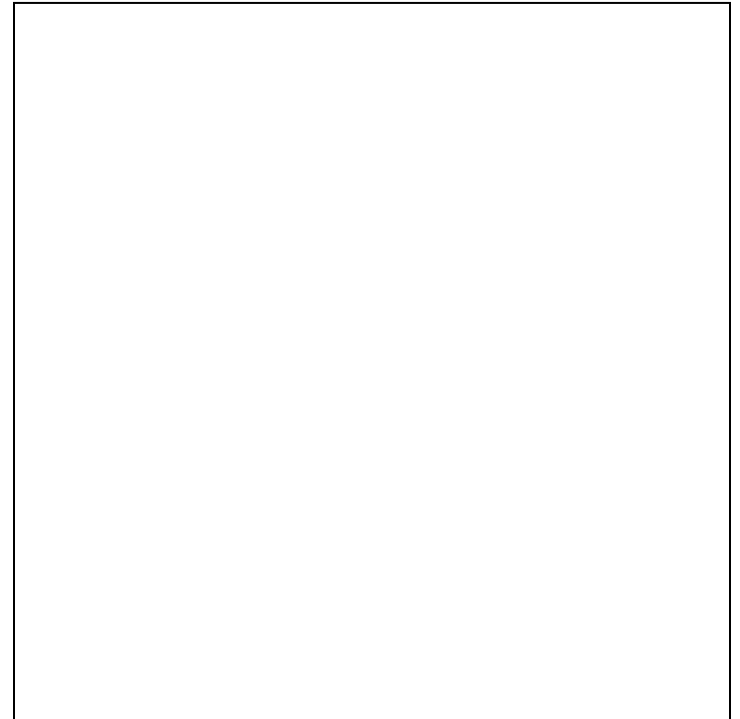

Write or draw about the next investigation you would like to do or the next place you would like to visit.

## My Summer Science Notebook

---

---

Draw a picture of yourself and family here.

Find a book about animals to read at the public library. Draw an interesting animal on this page. What does its skin look like? How does that kind of skin help it survive?

Visit a nearby park or playground. What kinds of moving can you do on the play equipment? Draw a picture of yourself and your family moving around and around, back and forth, and up and down.

Go to a grassy yard. Look closely at the ground and the plants growing on it. Do you see any flowers in the grass? Take a close look at a leaf. Are the edges of the leaf smooth or rough? What can you see when you use a magnifying glass? Draw two different shapes of leaves.

Go outside and look up at the sky. Are there any clouds in the sky? Draw the shape of one. Are clouds covering the whole sky or just some of the sky? Count how many clouds you see and write the number.

Look at a door inside the place you live—the door to a room or a cabinet. Draw the parts of the door including the hinges (the parts that connect the door to the wall). Is there another door that opens and closes in a different way? What shape doors have you seen?

What material is your home built of? Can you tell if it is made of wood, brick, metal, or plastic? Draw the outside of your home.
