

Name: \_\_\_\_\_

### During the Video

1. \_\_\_\_\_ is the powder used to make concrete.
2. Cement begins as \_\_\_\_\_ rock.
3. At the factory the rocks are crushed first to the size of \_\_\_\_\_.
4. Then they are re-crushed to the size of \_\_\_\_\_.
5. Extra minerals may be added next to make the \_\_\_\_\_.
6. Raw meal is melted to make \_\_\_\_\_, which is then sent to cool in storage.
7. \_\_\_\_\_ is added to delay drying time.
8. Concrete is made of 1 part \_\_\_\_\_ powder, 2 parts \_\_\_\_\_, and 4 parts gravel.
9. Professional pavers use big \_\_\_\_\_ trucks.
10. Cement & Concrete may be \_\_\_\_\_ of rocks, but they are no longer called "rocks" once they are changed by \_\_\_\_\_ and \_\_\_\_\_.
11. \_\_\_\_\_, Clay, Asphalt, and \_\_\_\_\_ are also made of rocks, but are no longer called "rocks" because they have been changed by humans and machines.
