

# Chrysalis

Three friends found a monarch butterfly caterpillar. They put it in a jar with a milkweed plant. The next day, they saw that the caterpillar had turned into a chrysalis. They wondered if the chrysalis was alive. This is what they said:

**Mac:** “I think the chrysalis is alive.”

**Lila:** “I think the chrysalis is no longer a living organism.”

**Antoine:** “I think the chrysalis is dead, but the butterfly that comes out is alive.”

Which friend do you agree with the most? \_\_\_\_\_ Explain why you agree.
