

### Nature Journal Observation Checklist

	YES	NO
I wrote the date and time of the observation down.		
I estimated the size of the species.		
I included color in my picture.		
I chose a species that was easy to observe.		
I have at least one drawing with labels.		
I recorded what the surroundings looked like where the species was living.		
I described other animals and plants living around it such as how many and of what type of each.		
I recorded what the species was doing.		
I added extra information such as a story, poems, questions, or other interesting details.
