

Maker Showcase Project

Energy exists in many forms and can be transferred and transformed.

Draw the electrical circuit in your project. Label the following:

- Source of the energy
- Input (beginning form of energy)
- Load (what uses the energy)
- Output (new form of energy)

How and why do things in our world change?

How do scientists investigate how the world works?

How do engineers develop solutions for problems in the world?

Maker: _____
