

## My Beak Sheet

What I think in the beginning:

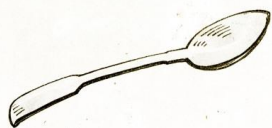

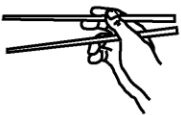

I think that the shape of a bird's beak is important because.....

Bird "Food"	I think a beak shaped like this would be good to pick up this kind of food.....
Gold fish crackers or Red Fish (Fish)	
Licorice (Worms)	
Sunflower Seeds or Peanuts (Seeds)	
Colored Water (Nectar)	
Mini Chocolate Chips or Rice (Insects, Ants)	
Mini Marshmallows (Caterpillars, Maggots)	

# What I found out!
