

Falling for Gravity Student Data Sheet

Things that I think will impact how the two balls fall are:		
Let's consider if weight impacts the outcome		
Ping Pong Ball	Baseball	Sheet of Paper
Record the weight of each.		
What happened when the two balls were dropped?		
What happened when the ball was dropped with a flat sheet of paper?		
What happened when the sheet of paper was crumpled into a ball?		
What do you think affects how fast an object falls?
