

Spheres Student Research Planning Sheet

Like Mario as a young boy, you are asked to select ways that one sphere interacts with another sphere. Our initial ideas are:

Event or Object	Sphere

We narrowed down our topic to explore _____
which is found in the _____ and how it interacts with
_____ which is part of the _____.

Fill in the circles with the two spheres that you will researching. Draw an arrow or arrows representing what way the interaction happens.

While doing your research, you need to be able to explain the interaction that happens between the two events/objects which are found in different spheres.

- Develop a paragraph that will inform people about the topic.
- Create an image that shows the relationship.
