

North	South	East	West
0.0	0.0	0.0	0.0
	0.0		0.0
0.0 yds. North of start		0.0 yds. East of start	

Input your distances (in meters) into the shaded chart.
 The spreadsheet calculates the totals (in meters) and
 final destination relative to the starting point (in yards).
 Suggestion: pick distances that make the destination end
 up on a whole yard-line marker.
