

ANALYSIS OF SOUNDS FROM INVENTORY

MATERIALS LIST

For each group:

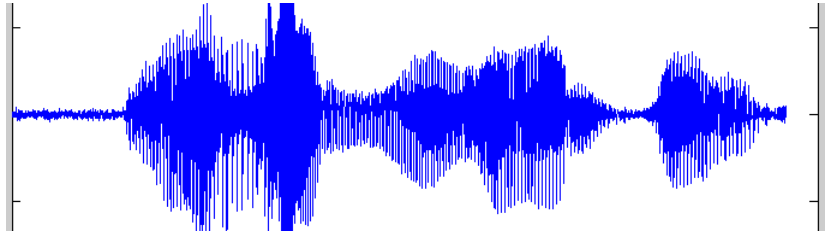

- data sheet
- sound files
- Raven Lite software

GOAL AND PREDICTIONS

To visualize the sound from the loudest to the quietest areas of the school, looking at the similarities and differences in their spectrograms.

Prediction: I think that the sound waves from the loudest area of the school will look like

Prediction 2: I think the sound waves from our quietest area of the school will look different/the same from our loudest because

What did our sounds look like using a spectrogram?

My final claims based upon my evidence (data):

My evidence is:

Name: _____ Period: _____ Data Sheet 3
