

### **Disinfecting Services**

All rates based on square foot area per session  
100 square foot minimum  
8.25% tax will be applied

Electrostatic spraying uses charged particles to coat surfaces and provide for easy large-scale dispersal of EPA-registered disinfectants. This disinfectant dispersal method increases pathogen droplet attraction, which may be helpful to slow the spread of COVID-19.

Although the EPA continues to study electrostatic spraying of disinfectants, there is evidence that electrostatic spraying is an effective method of disinfection, especially for hard to reach areas or remote surfaces that may not have been disinfected through manual processes. This technology, as part of an overall cleaning and disinfection program, can help create a safe and healthy environment while decreasing the risk of cross-contamination.

### **Electrostatic Spraying Services**

20¢ per square foot/ per session

*\*Please note: All items such as electronics and personal items will need to be removed from the room prior to us spraying. Houston First is not responsible for damages to items beyond our control.*

To place an order for cleaning during your event,  
please contact your assigned Convention Services Manager
