To Whom It May Concern:

I am writing this letter to recommend teacher's name for the Shell Science Lab Regional Challenge. I have had the opportunity to work with teacher's name for 6 years at school name. During this time she has served as the Pre-AP Biology, IPC, and AVID teacher, as well as serving as the biology team leader.

teacher's name is a strong and dedicated educator. She always looks for innovative ways to teach science while utilizing research-based strategies focused on the needs of individual students. She has a special heart for new teachers and works hard to coach them early in learning to use best teaching practices, especially in the areas of student collaboration and inquiry.

One of teacher's name strongest attributes is her ability to build strong relationships with students by capturing their heart first, so that their minds can follow during instruction. She has a whole-child approach to education that creates an environment of belonging and connection.

The revised Biology TEKS presented several challenges for teachers. One of those challenges is a need for specific equipment to properly conduct labs and activities. Equipment such as a PCR machine, microcentrifuge, incubators, and probes, helps students put their STEM skills into action as they invent, innovate, and discover.

I wholeheartedly support the teacher's name application for the Shell Science Lab Regional Challenge. Please contact me with any questions, or if you need additional information in support of this deserving educator. You may reach me at phone number or [e-mail](#).

Sincerely,

Author's name
